

Training Academy

- Built for the industry, from the industry
- Practical, compliance informed training
- Clear pathway to accreditation
- Flexible delivery solutions - online, in-person

Carbon Literacy Training

Training accredited by the Carbon Literacy Project delivered by the Ecogenesys Training Academy.

What is Carbon Literacy?

Carbon Literacy is a recognised training standard that helps individuals understand climate change, carbon impacts and most important what actions they can take in their role and organisation to reduce them.

The Carbon Literacy Project (run by The Carbon Literacy Trust) is the main accreditation body for Carbon Literacy learning worldwide.

“Some of the most important training I've ever done... I thought I knew about climate change, carbon reduction, and sustainability, I thought we were doing our bit, and then I went on a Carbon Literacy course. One day out of a busy diary, but boy did it make a massive difference. I was wrong on so many things that I thought I knew.”

BBC North

Why CLP accreditation matters?

- Recognised standard
- Consistent, quality assured
- Credible and external validated

Added value from Ecogenesys

- Tailored, practical and grounded in expertise
- 20 years of compliance experience and environmental expertise
- Relevant, actionable and aligned
